PRODUCT INFORMATION

DEMOL RN

(Versatile Anionic Dispersant for Versatile Usage in Water)

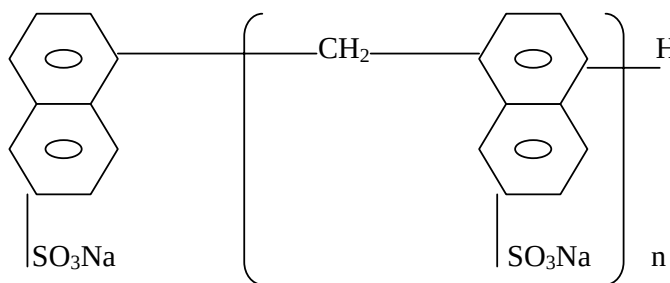

DEMOL RN, Sodium salt of beta –Naphthalene Sulfonic Acid Formaldehyde Condensate, show strong dispersing ability to versatile kind of powder in aqueous system.

For better color, we recommended tan colored Demol N, one of our Demol series products and its function is similar to Demol RN.

GENERAL PROPERTIES:

Chemical composition : Sodium Salt of Beta Naphthalene Sulfonic Acid Formaldehyde Condensate.

Chemical Structure :

Ionization : Anionic Surfactant

Appearance : Brown Colored Powder

pH (1 % aq. Sol) : 9.0 – 10.5

Sodium Sulfate : 2.5 % min

Dry content : 93 % min

PACKING

25 kg net in plastic bag.
